## Projected Global Water Scarcity, 2025

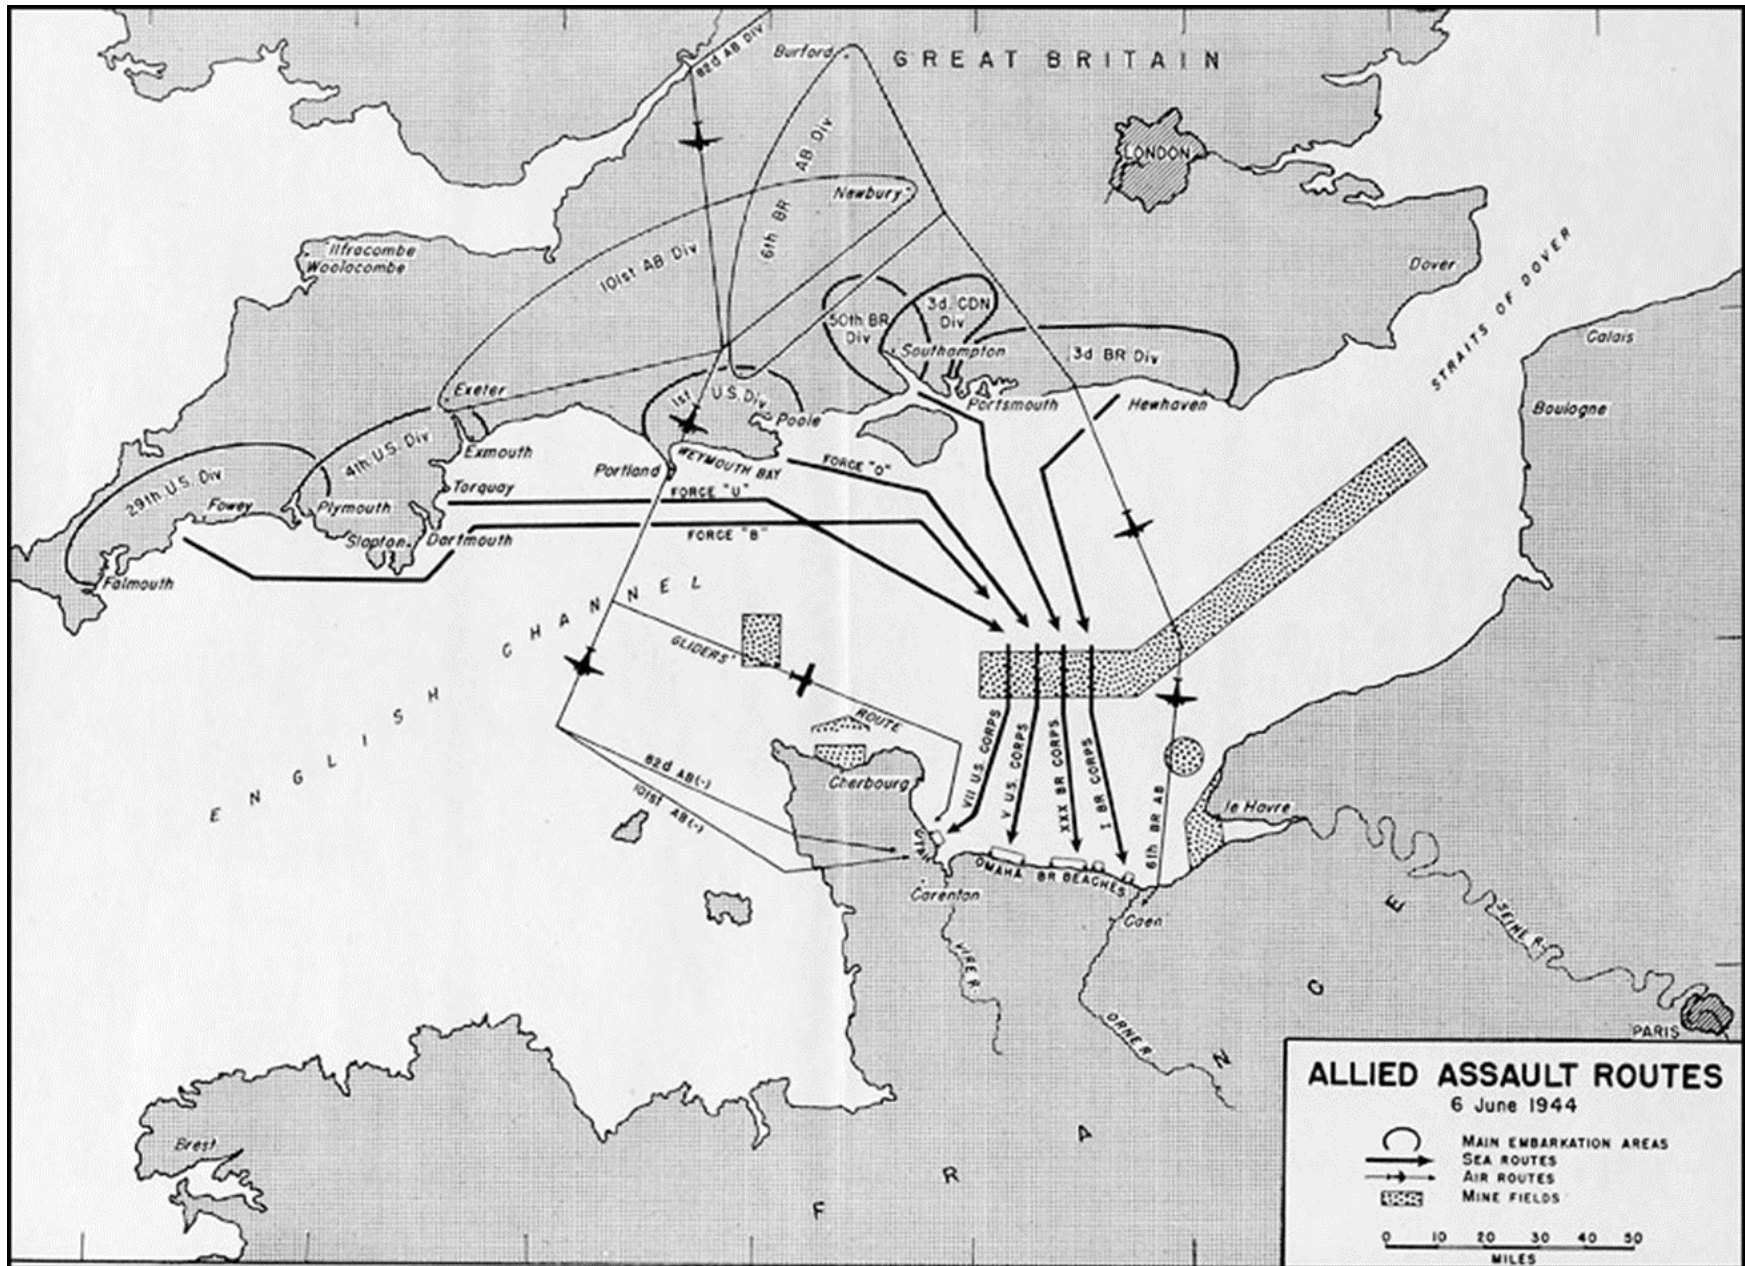

- Physical water scarcity:** More than 75% of river flows are allocated to agriculture, industries, or domestic purposes. This definition of scarcity — relating water availability to water demand — implies that dry areas are not necessarily water-scarce.
- Approaching physical water scarcity:** More than 60% of river flows are allocated. These basins will experience physical water scarcity in the near future.

- Economic water scarcity:** Water resources are abundant relative to water use, with less than 25% of water from rivers withdrawn for human purposes, but malnutrition exists.
- Little or no water scarcity:** Abundant water resources relative to use. Less than 25% of water from rivers is withdrawn for human purposes.
- Not estimated**

How has this issue continued or changed over time?

BY HY MAYER

Look forward, women, always; utterly cast away  
The memory of hate and struggle and bitterness;  
Bonds may endure for a night, but freedom comes with the day,  
And the free must remember nothing less.

Forget the strife; remember those who strove—  
The first defeated women, gallant and few,  
Who gave us hope, as a mother gives us love,  
Forget them not, and this remember, too:

How at the later call to come forth and unite,  
Women untaught, uncounselled, alone and apart,  
Rank upon rank came forth in unguessed might,  
Each one answering the call of her own wise heart

They came from toil and want, from leisure and ease,  
Those who knew only life, and learned women of fame,  
Girls and the mothers of girls, and the mothers of those,  
No one knew whence or how, but they came, they came.

The faces of some were stern, and some were gay,  
And some were pale with the terror of unreal dangers;  
But their hearts knew this: that hereafter come what may,  
Women to women would never again be strangers.

Alice Duer Miller.
