November 2021
Career & Technical Education

New York State’s approval process for Career and Technical Education (CTE) programs has raised the quality and rigor of courses that prepare students for employment and postsecondary study. Approved programs lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree. CTE courses offer students the opportunity to apply academic concepts to real-world situations and prepare them for industry-based assessments or certifications. They have the opportunity to earn college credit or advanced standing while still in high school and take part in work-based learning opportunities where they demonstrate mastery of skills essential in the workplace. In addition, our Technically Endorsed programs, embedded in area businesses, have been recognized by District Administration magazine as one of more than 50 national innovative programs. In 2021, 412 seniors from OCM BOCES’ component districts were eligible to earn CTE endorsements on their high school diploma, including East Syracuse Minoa students Cameron Beine, Maxim Otte, Caleb Thomas and Sydney Nicotra.

OCM BOCES & East Syracuse Minoa = Student Success

Isaiah Khanif has made significant gains in the OCM BOCES SKATE (Scaffolding Kids Abilities Through Education) program at Woodland Elementary School. The fourth-grader with bright brown eyes and an infectious smile has shown exceptional progress in his reading and math skills over the past two years, said his teacher, Mary Beth Croyler. He has also improved his social skills, revealing himself to be an “outgoing, friendly and caring student” both inside and outside the classroom, she said.

Chrysler believes Isaiah thrives in his educational setting because the highly structured SKATE program is designed to help students like Isaiah who are on the autism spectrum. It offers small class sizes, individualized learning targets, visual learning tools, and continued support throughout the school day.

Because it is housed at Woodland, Isaiah and his OCM BOCES classmates get the added benefits of being part of a larger school community. Throughout the past year, for example, Isaiah has pushed into “specials” — art, music, library and physical education. He also enjoys eating with his peers in the cafeteria and playing with them on the playground. All of these experiences have contributed to his ability to make positive social connections, Chrysler said.

In addition to his social and academic progress, one of Isaiah’s special talents — drawing — has become obvious to those around him. “He has amazing artistic abilities that his peers always take notice of,” Chrysler said. “He is a fantastic artist and excels at all art projects.”

Did You Know?

East Syracuse Minoa sent three students to the Adirondack Field Studies experience this summer. This program, held at SUNY ESF’s Cranberry Lake Biological Station, immerses students in a full week of learning, culminating in student groups developing and conducting their own investigations. Student groups present their investigations and findings at the end of the experience and earn an upper-level credit from SUNY ESF upon completion. Additionally, ESM High School sophomore Leslie Yakubu and her group presented their work to the OCM BOCES Science Leadership Network in October 2021.
