New York State's approval process for Career and Technical Education (CTE) programs has raised the quality and rigor of courses that prepare students for employment and postsecondary study. Approved programs lead to an industry-recognized credential or certificate at the postsecondary level, or an associate or baccalaureate degree. CTE courses offer students the opportunity to apply academic concepts to real-world situations and prepare them for industry-based assessments or certifications. They have the opportunity to earn college credit, advanced standing while still in high school and take part in work-based learning opportunities where they demonstrate mastery of skills essential in the workplace. In addition, our Technically Endorsed programs, embedded in area businesses, have been recognized by District Administration magazine as one of more than 30 national innovative programs.

In 2021, 412 seniors from OCM BOCES’ component districts were eligible to earn CTE endorsements on their high school diplomas, including Onondaga students John Gavilare, Jason Cousins, Decker, Shayan Hayes, Shantice Hayes, Justice Hill, Emily Nieto, Colin Walker and Ailen Walters.

### Did You Know?
This year, the Onondaga Central School District joined the new Unmanned Aircraft Systems (Drone) Program offered through OCM BOCES. Students learn through a local company, SkyOp, and gain the needed skills to take the “Part 107” test at the end of the course so they can become certified commercial drone pilots through the Federal Aviation Administration. This new course combines aspects of meteorology, map reading, mathematics, understanding regulations, video editing, photography, and many other skills. The drone industry is growing very rapidly and is projected to have applications in law enforcement, disaster recovery, agriculture, construction, resource recovery, energy infrastructure, real estate, and entertainment.
